**TOP GUN**

The Top Gun Laparoscopic Skills Shoot-Out is an event that combines fun, excitement and entertainment along with competition, perseverance and SWEAT! The concept that Dr. Rosser originated at the Yale University School of Medicine is designed to provide the ultimate arena for the residents to demonstrate their laparoscopic skill development while promoting friendly competition between academic education centers. Four years of development have been devoted to create a series of drills that are associated with the acquisition of a clinically related task (intracorporeal suturing). A database of thousands of surgeons has been collected that enables the objective comparison of participants with their peers. These drills and suturing exercises are specifically designed to challenge each surgeon’s level of skill in performing tasks in the laparoscopic arena. Additionally these exercises aid in increasing the effectiveness of the non-dominant hand, maturing depth perception compensations, increased instrument accuracy and promoting the effective choreographed movements of both hands. Top Gun has been featured at the American College of Surgeons since 1996 and is now part of SLS and SAGES as well.
